Pin code for key safe

After receiving your online check-in details, you will be registered in our in-house system and receive your personal key pin, which you use to release your apartment key from the key safe on arrival at the main entrance.

On arrival, park in front of the main entrance.

You will find the key wall in the entrance portal on the right. Enter your pin code here and your key box will open. Just take out **the one** envelope deposited for you with your key for apartment 802.

There is a poster next to the key box showing house 8. Now drive to the loading and unloading entrance (see poster). Use the apartment key to open the barrier and park immediately on the right on the grass verge. The stairs lead to the second entrance (house 8).

The second key with the number 10 is for the gate of the underground parking garage. Your parking space no. 7 is in the lower part, exit on the left. A door leads from the garage into the stairwell. On the ground floor, go through the glass door on the right. The long corridor takes you to the entrance area next to the indoor pool. Through the large glass door you enter the courtyard and see your house entrance no. 8.
